

SARAB ALI KHAN

Full Stack Developer

+971 55 941 0958 | sarabalikhan98@gmail.com | [Github](#) | [Linkedin](#) | Dubai, UAE | Immediate Joiner

PROFESSIONAL SUMMARY

Results-driven **Full Stack Developer** with more than 7 years of experience delivering scalable, secure, and high-performance web applications. Strong expertise in **Angular, React, Node.js and Spring Boot**. Proven ability to design end-to-end solutions, integrate APIs, and build responsive, user-centric interfaces. Experienced in **CI/CD pipelines, Docker, and Agile methodologies**, ensuring efficient and reliable deployments. Adept at collaborating with cross-functional and international teams to deliver business-focused solutions. Passionate about clean code, performance optimization, and continuous learning.

SKILLS

PROGRAMMING LANGUAGES: JavaScript | TypeScript | Python | Java

FRAMEWORKS & LIBRARIES: React | Angular | Node.js | Spring Boot | Bootstrap

TOOLS & TECHNOLOGIES: Git | CI/CD | Docker | Bitbucket | RabbitMQ | Material | PrimeNG

DATABASES: MySQL | MongoDB | PostgreSQL | MariaDB

PROFESSIONAL EXPERIENCE

Sr. Full Stack Developer

ProgatiX - Karachi || January, 2025 – Present

- Lead development teams, providing technical guidance, conducting code reviews, enforcing best practices, and mentoring junior developers to ensure high-quality, maintainable code aligned with architectural standards.
- Oversee system architecture and integration, ensuring seamless communication between front-end and back-end components while aligning technical solutions with business goals.
- Act as a client-facing technical lead, collaborating directly with stakeholders and product owners to gather requirements, provide updates, and translate business needs into technical solutions.
- Optimize applications for scalability, performance, and maintainability across multiple platforms, proactively identifying and resolving technical bottlenecks.
- Take full ownership of product features from ideation to deployment, prioritizing tasks, defining requirements, and ensuring timely delivery while coordinating cross-functional teams.
- Drive MEAN Stack development, designing and implementing scalable applications using MongoDB, Express.js, Angular, and Node.js to deliver robust Software solutions.

Full Stack Developer

Conure Technology Services LLC. - Karachi || October, 2021 – December, 2024

- Design, develop, and maintain scalable web applications, combining modern front-end frameworks using Angular and React.js with robust back-end technologies Java Spring Boot, Node.js
- Ensure seamless integration between front-end and back-end components for fully functional applications.
- Collaborate with cross-functional teams, including designers, data engineers, and product managers, to deliver end-to-end solutions.

- Optimize applications for performance, scalability, and maintainability across multiple platforms.

Web Developer

Intrepid - Karachi || January , 2018 – October , 2021

- Build responsive, scalable websites and web applications using modern technologies like Node.js, Angular, and React.js.
- Customize themes and plugins to implement specific features, workflows, and design requirements.
- Convert UI/PSD designs into pixel-perfect, user-friendly interfaces with cross-browser compatibility.
- Work closely with clients to gather requirements, provide updates, and ensure timely delivery of high-quality solutions.

EDUCATION

Bachelor's in Software Engineering

Indus University , Karachi | 2016 - 2020

PROJECTS

HIVE

Description: IoT-based system for monitoring and controlling building facilities to optimize resource use and enhance occupant comfort.

Link to the project: [View Project](#)

ParkSmart JAH (John Hopkins Aramco Hospital)

Description: Implemented a smart parking solution using IoT sensors to manage parking occupancy and improve operations in healthcare facilities.

Link to the project: [View Project](#)

HCM (Human Capital Management)

Description: Built a system to track employee work hours, leave, and productivity metrics.

Link to the project: [View Project](#)

IPAAS (Integration Platform as a Service)

Description: Developed and maintained iPaaS, a cloud-based integration platform enabling seamless, real-time connections between business systems, ensuring scalable, secure, and efficient data synchronization.
